

CAROLON

Smart Sleeve®

Multi-Layer Compression System

Electronic compression sensor provides
applied interface ankle compression

Can be used on any patient • Economical • Calibrated for accuracy

APPLY
Smart Sleeve

ATTACH
sensor at ankle

WRAP
with accurate compression

**Easily control each layer of applied compression
to control total compression at the critical ankle area.**

- Does not require calibration
- Adjust compression for each patient's needs
- Consistent application of compression for patients through compression treatment
- Sensor is left in place so that compression readings can be taken repeatedly
- Battery powered portable reader for continuous use

Priced to compete with current wrap systems
